

Shantanu Baviskar

Full-Stack Product Generalist | Design, Development, & Testing

- English, Hindi & Marathi
- Thane, Maharashtra, India
- hello@shantanue.com

- 28th December, 1999
- +91 77158 97332

Versatile Product Engineer specializing in delivering end-to-end software solutions. By integrating advanced AI workflows into UI/UX design, full-stack development, and QA testing, I rapidly accelerate the product lifecycle, taking concepts from wireframes to fully tested, deployed applications efficiently and effectively.

Experience

Freelance

Web Apps, Telegram Bots & Mini-Apps Developer
Android, iOS & Windows Apps Developer

2025 - now

Remote

Fityc Health

Associate Product Manager

Dubai, UAE

2022 - 2024

Data-Driven Decision Making

Analyzed user behavior metrics and feedback using Hotjar and GA4 to identify friction points in the user journey, resulting in a 15% increase in feature adoption over six months.

Agile Collaboration & Execution

Managed the end-to-end product lifecycle for minor feature enhancements, including writing clear PRDs (Product Requirement Documents)

Projects

1. Ava · Portfolio Manager

Your All-In-One Portfolio Hub to organize your trades, jot down strategies, use AI to generate trading signals, track impactful market events and much more!

2. PDF Password Unlocker

A modern, fast, and secure web application to remove passwords from your PDF files directly in your browser.

3. WrestlePredict · Work In Progress

A gamified full-stack Telegram Mini App for wrestling fans to predict match outcomes, track prediction accuracy across live events, and compete in dynamic global and chat-specific group leaderboards.

4. Micro-Tools & Extensions

DOM & UX Modifiers: Authored browser automation and UI-cleaner script ([published on GreasyFork](#)) to automatically detect and remove intrusive Grammarly Plus upgrade popups.

Folder Icons Locker: Prevents third-party software like Google Drive from resetting Folder Icon in Windows

Accomplishments
